PROJECTS

StayBooking -Stay Smart. Book Smarter. 🐙

- Developed a full-stack accommodation platform that streamlines the rental process by connecting tenants directly with verified property owners for PGs, flats, and individual rooms.
- Implemented advanced search filters based on location, pricing, and amenities to enhance user experience and improve discovery.
- Engineered using the MERN stack (MongoDB, Express.js, React.js, Node.js) and styled with Tailwind CSS to ensure a clean, responsive, and scalable interface.
- Integrated key features including real-time owner chat, a shortlist (basket) system, and instant booking with dynamic price comparison.

WanderLust -Find your perfect stay, Far Away. 🐙

- Wanderlust helps you explore and book stays across India with ease – from budget rooms to premium getaways, all in one place.
- Built using the MERN Stack – React.js, Node.js, Express, MongoDB – and styled with Tailwind CSS for a seamless travel experience.
- Dynamic property listings with filters, booking system, user roles, availability calendar, reviews, and secure authentication.
